<p>Allianz Strategy 15</p>	<p>The investment objective is geared, in the long term, towards generating mainly capital growth with regard to the portfolio's equity portion by investing in the global Equity Mmarkets and, with regard to the portfolio's Bbond/Mmoney Mmarket portion, towards generating a market driven return with reference to the Euro denominated Bbond / Mmoney Mmarkets within the scope of the investment policy <u>in accordance with the requirements of the Sustainable and Responsible Investment Strategy (the "SRI Strategy")</u>. Overall, the goal is to achieve a performance comparable to a balanced portfolio with a volatility range of 1% - 7%.</p> <p>The assessment of the volatility of the capital markets by the Investment Manager is an important factor in this <u>investment</u> process, with aim of <u>achieving a performance</u> typically not falling below or exceeding a volatility of the Share price within a range of 1% - 7% per annum on a medium to long-term average, similar to a portfolio consisting of 15% global Equities <u>markets</u> and 85% medium term Euro bond <u>markets</u> denominated Debt Securities.</p> <p>In doing so, the fund management <u>Investment Manager</u> will specify a weighting of investments in Bbond-, Mmoney- or Eequity-Mmarket oriented positions, based on a quantitative approach with volatility as key input factor.</p> <p>In times of high volatility, the Eequity Mmarket oriented portion will be reduced.
